SUMMARY

Solutions-driven IT professional combining software logic with core server administration concepts. Possesses a solid baseline understanding of Active Directory, virtualization , Windows Server environments and cloud operations . I am eager to pivot my logic-driven problem-solving skills toward maintaining secure, efficient, and scalable enterprise IT environments

EDUCATION

2021-2024	Bachelor of Compter Applications at Kolhan University	(Grade: 85.7)
2019-2021	Intermediate in SCIENCE(PCM) CBSE at Dav Public School	(Grade: 83.4)
2019	Class 10th CBSE Board at Nml Kps	(Grades: 81)

WORK EXPERIENCE

1. SPINNY PROFILE : AI Prompt Assistant (Jun 2025 - Mar 2026)

i) Spearheaded process automation initiatives, reducing manual efforts required in day-to-day operations tasks. Prompting AI bots for efficient outcomes. Delivered client-facing communication and solution advisory, ensuring a smooth product evaluation and decision-making process.

iii) Leveraged enterprise CRM tools to log technical diagnostic data and track interaction metrics, ensuring accurate ticket routing. Analyzed system error logs to identify recurring platform issues and streamline technical troubleshooting workflows.

2. BHARAT INTERN PROFILE : Full Stack Developer (Oct 2023-Nov 2023)

As a Front End Developer intern at Bharat Intern, I successfully delivered impactful projects in content management and project management systems. Leveraging my skills in JavaScript, MERN stack, MongoDB, Github and Efficiently managed APIs.

3. INTERNPE PROFILE : Front-End Developer (Nov 2023 - Dec 2023)

Successfully engineered and optimized interactive UI components utilizing modern front-end framework. Collaborated directly in workflows to translate design specifications into responsive web applications.

PROJECTS

[{Link to Project}](#)

1. **BLOGIFY:** As my Final Year Project, I gained extensive hands-on experience in full-stack development, mastering key technologies such as Express.js, React, and Node.js. The website (Blogify) showcases my proficiency in front-end and back-end development, demonstrating robust functionality and sleek design of a BLOG website.

2. **CONTENT MANAGMENT SYSTEM:** (CMS) in PHP is used to create, manage, and improve the digital experience of your customers. A CMS is a piece of software that allows users to collaborate on the creation, editing, and publishing of digital material such blog posts.
